Dear Sir/ Dear Madam,

The paper named "**The Importance of E-learning and GSM Alarm System in the Medical Engineering**" represents an interdisciplinary approach of medical engineering field. Much more, the paper presents one topical issue, such as the introduction and the adaptation of the new technologies in health care. For this reason, we appreciate that "*Applied Medical Informatics*" is the adequate review for our paper, because we propose a system which helps in the monitoring of the patients parameters.

Best Regards,

Maria-Lavinia POPESCU

Flaviu-Ilie URS
